The Honorable Jennifer Tooker  
First Selectwoman  
Town of Westport  
Town Hall  
110 Myrtle Avenue, Room 310  
Westport, CT 06880

Dear First Selectwoman Tooker:

Subject: Town Notification – Final Design Plans (100%)  
State Project No. 158-223  
Westport Maintenance Facility

The Department of Transportation's (CTDOT) Office of Engineering has developed plans for construction of a new maintenance facility on 900 Post Road East in Westport. The purpose of this project is to replace a functionally obsolete maintenance facility.

The project involves the construction of a general maintenance building. The 22,600 square foot general maintenance building will consist of approximately 17,000 square feet of bay area and a 5,600 square foot office area. The new building will include operational areas for maintenance operations, private office areas, and supporting office spaces. Corresponding site improvements which will include a truck wash facility, primary storm water treatment will be made and the existing facility will be converted to a storage facility. CTDOT will add a drive directly to the Sherwood Island Connector to enhance our roadway and winter operations. No additional personnel or equipment are anticipated under the project. The present schedule indicates the final design plans were available on September 24, 2024. The project will be state funded.

Provided via email are web links to the final design plans and specifications (100%) for the referenced project. In order to maintain the aggressive project schedule, please forward any comments to my attention on or before November 1, 2025.

It is CTDOT's policy to keep the public informed when such projects are undertaken. It is important that the community share their concerns with us to assist in the project's development.

The Honorable Jennifer Tooker
